

On December 17, 2022, a trip was made to Azgard-9 Limited Lahore. This visit to Azgard-9, a Pakistani manufacturer of vertically integrated denim solutions, enhanced the students' comprehension of numerous subjects. This visit offered students with the opportunity to observe and engage with actual workstations, plants, machines, systems, and assembly lines, as well as highly skilled and experienced staff. This company wants to improve the denim industry by manufacturing more sustainable items by regulating every phase. They brief us on their industry and the organizational structure of the Azgard-9. Throughout the course, students learned about the production, quality, and service management policies of the organization as well as the operation of various equipment. They took pupils on a tour of the entire industry and demonstrated how different departments performed various jobs. There, we identified the distinguishing characteristics of their customers and products, as well as the bulk of their customers and items. The tour was extraordinarily comprehensive and filled with inspiration and wisdom.
